
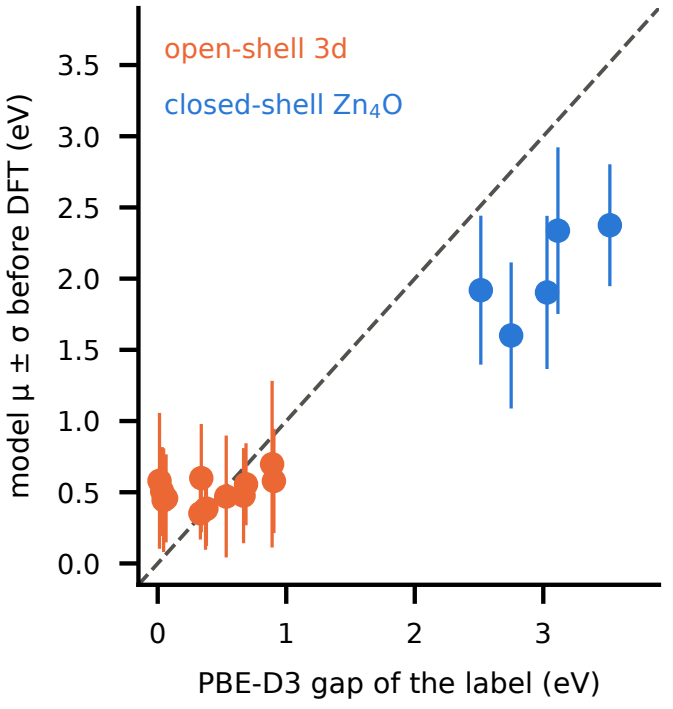
labels retrain the surrogate · band-edge character · periodic GFN1-xTB check

Open-shell Fe, Co, Cu: 13 of 13 below 1 eV; model error 0.23 eV; Fe and Co edges are metal d

Closed-shell Zn_4O: model 0.96 eV too low; organic band edges; periodic xTB within 0.23 eV


At this DFT budget: 3 to 4 times more low gap hits than random selection; retraining adds little
